Legend / Footnotes:

0 Transactions are possible but are zero for a given period.

(*) Transactions between zero and +/- \$500,000.

D Suppressed to avoid disclosure of individual companies.

n.a. Transactions are possible, but data are not available.

..... Not applicable, or for data periods 1960-1997, transactions that are 0, not available, or not applicable.

Quarterly estimates are not annualized and are expressed at quarterly rates.

1. The residual is calculated as the difference between the service type-based seasonally adjusted total and the sum of the individual countries and the all other countries aggregate. The seasonally adjusted country and world area data will not sum to the seasonally adjusted service type-based totals because the seasonally adjusted country and world area data and the service type-based totals are derived from different aggregations of the export and import data and from different seasonal adjustment models.
